Settings for Lesson Plugin in Course Connect

1. General Settings

There are three key settings under the General tab when creating a lesson:

- Name
- Description
- Display

The *name* and *description* fields are required for the lesson. You can also use the button at the bottom of the page to display your description on the course page.
2. Appearance

- The *Progress Bar* option will display a progress bar while students work on the lesson and show them how far along in the lesson they are.
- The *Display Menu* will show students a menu of all of the content and question pages you have created.

3. Availability

The availability section allows you to:

- Set the *Available From* date: this means that the lesson will only be available after the date you have set here
- Set a *Deadline*: this is when the lesson must be completed by
- Set a *Time Limit*: this will limit how long students can spend on a lesson
4. Flow Control

The settings listed here will allow you to control how students move through the lesson. You can:

- **Allow student review**: this will allow students to review parts of the lesson they have already seen. Students will be able to move through the lesson out of order.
- **Provide option to try a question again**: this gives students the option to retry questions during the lesson.
- **Set the Maximum Number of Attempts**: if you have selected ‘yes’ for provide option to try again, you can also limit the number of times students are allowed to try again by using this setting.
5. **Grade**

In *Grade* settings you can:

- Categorize your lesson by using the *Grade Category* drop down menu and selecting a category from your gradebook
- *Set a Grade to Pass* (the minimum grade required of students to pass the whole lesson)
- Allow re-takes
